

## INSTRUCTIONS FOR THE PROPER USE OF "METASAIL" TRACKING DEVICES

- 1) Each device is associated to the specific participant to whom it is given and thus assigned. It is important not to exchange them between participants or forget them ashore.
- 2) Devices are already full charged and ready to use. They will switch on and off automatically for regattas. **NO ACTION ON THE DEVICES IS REQUIRED BY THE ATHLETES.**
- 3) **IMPORTANT !!!** The devices must be attached at the bottom mast between the boom vang fitting and the boom, without the use of tape directly on the device to avoid adhesive tape residue on the device. For this purpose you can collect at the secretary the necessary light plastic bag in which you can place the device before taping it to the mast. **NO TAPE DIRECTLY ON THE DEVICE, USE THE DISPOSABLE BAGS TO TAPE IT.**
- 4) The devices have sufficient charging autonomy for the entire event. You will bring them back after last day's races. The device must be returned rinsed with fresh water and cleaned as it was received (without traces of adhesive tape)
- 5) The races are available to be seen live and/or deferred on METASAIL's website
