

2022 Formula Kite World Championships

Question for Officials

Date: 2022-10-11

Question No: 23

Question For: Technical Committee

Question:

Is it allowed to bring backup equipment into the Venue? i.e. spare kites and spare foil setup. And how to inform the security committee that this is not registered equipment that needs to stay in the venue?

Answer:

Based on NOR16.5 we can only control equipment subject to registration, so the equipment with the Black Event Limitation Marks. There is no rule preventing you from bringing in and out spare equipment.

For removing and bringing in gliders please come and see us as there are only the serial numbers to control it.

For questions (repair, removal...) and replacements you have to use the online form at racing rules of sailing. This still requires to show the equipment to the TC before you remove it from the venue.
