

## 2023 GNS Séries I

### Question for Officials

**Date:** 2023-05-31

---

**Question No:** 03

**Question For:** Technical Committee

**Question:**

I recently purchased a Tanzer 22, sail number 2111 previously owned by Shelly Dorfman and registered with GNS. I registered with GNS to race this season however realize I may have given mis-information re the boat's handicap. The boat since 2021 is equipped with a furling jib, as per GNS archive 2022 under the previous owner (Shelly Dorfman) the white sail handicap June 28 series 2 is listed as .914. (In 2019 the handicap was .92.) I suggest the furling jib would reduce sailing performance as 6 inches of the genoa was removed and UV protection was added. I do understand that adjustments may be awarded for such a modification. If this is valid and my assumption correct, would my Division 3 white sail handicap remain at .914? What would my boat's rating be for division 2 PHRF 3 with spinnaker.  
Thank you.
