

Marina Militare Nastro Rosa Tour "I GIRO"

Question for Officials

Date: 2023-07-11

Question No: 01

Question For: Technical Committee

Question:

During waszp race 3 my supplied waszp (number 5) had a weld failure on the gantry (rudder box) causing me to retire from the race due to my rudder box becoming unattached from the boat. This breakage was out of my control as it was unpredictable and only broke due to load on the joint at the top mark. I would like to apply for redress to receive average points for that race.

Answer:

Boats were given and used in previous stage of the event. Breakage can happen at any moment at any boat and their prediction is impossible. Maintenance and inspection in order to prevent or repair boats are in charge of the person(s) using the boat. Redress is not given
