

Asian Sailing Championships & Asian Continental Olympic Qualifier for 2024 Paris Olympics

Question for Officials

Date: 2023-12-13

Question No: 01

Question For: Organizing Authority

Question:

Please could str 8.2 be clarified if it allows the use of a smart phone (in air plane mode) to record video or photos?

Many thanks

8.2 Recording of information by a device provided that the data recorded cannot be downloaded or made available for analysis when it comes ashore.

Answer:

It is allowed to record video or photos by smart phones or any camera, provided the smart phone is in airplane mode and not connected by any communication means. "the data recorded cannot be downloaded or made available for analysis" does not apply to videos and photos but only applies to scientific data.
