Question for Officials

Date: 2026-05-02

Question No: 09

Question For: Race Committee

Question:

Hi. We are seeking permission from the Race Committee at the conclusion of racing today to bring onto Ino Veritas up to 4 sails (these are recorded on our ORC certificate) that we would like to test if the wind builds enough. The NOR 3.1 m) ii requires the sails to remain the same from when we leave the dock until we return to the dock, so we are requesting permission to change the sails after racing is concluded for the day but before returning to the dock.

Appreciate your consideration of this request

Answer:

It is authorized only if, once the races for the day have finished and before the new sails are brought on board, a member of the Technical Committee is able to come aboard and check the sails that were used during the day's racing, will the new sails be permitted to be embarked.

If, for logistical reasons, the Measurement Committee is unable to come aboard and carry out this inspection, the operation will not be authorized.
