Question for Officials

Date: 2021-08-26

Question No: 01

Question For: Technical Committee

Question:

As Bahçeşehir University, there was a malfunction at our helm today and for this reason, we had to apply glue in order to participate in the upcoming races. We wanted to do this after the flag had landed and we did it between 17.00 and 18.00. Then we immediately put the rudder in place. We did not have the opportunity to inform the technical committee beforehand. As you said at the meeting, we paid great attention to this rule, but due to a compelling reason, we could not inform you. As of 18:00, we would like to send you the photos we put on the helm.
