## 7. Description Of Incident

During an equipment inspection of the boat MATRAC II, after its finish at race 2, I request from the skipper to put out of the boat the biggest sail of each type (mainsail, headsail, spinnaker) to check their compliance with the IRC certificate of the boat. The mainsail, the headsail and the spinnaker displayed were measured according the IRC Rule. The mainsail dimensions and the headsail area were smaller than their limits, but the area of the spinnaker was bigger than its limit as read in the certificate (area after measurement = 144.81, while area limit SPA=141.89).
