## 7. Description Of Incident

Race 1 was validated where the wind was not suitable for racing at the top mark. The wind strength was far to be stable from the committee boat to the top mark. We could clearly see the kites not being able to keep going and even struggling to stay in the air in the top mark area, from my experience, the wind was blowing around 3/4 knots not more. Only 11 & 12 riders could finish the race in the men fleets which represent almost 50% of the whole fleet. Only 6 women could finish out of 21, even less than 30% of the entries. To me and to a lot of other riders, this race result doesn't represent the level of the fleets, the luck factor of not being at the right place really affects the result. This race was not fair for the fleet and would really affect the rest of the World Series season.
