

COVID-19 Operational Protocol for the return to the official national, non-professional competitions (2020-2021 Season)

Reinforced protocol by the Spanish Royal Sailing Federation (RFEV)

Backed up by all the Autonomous Communities-Regions, Spanish Federation of Municipalities and Provinces, Spanish National Sports Federations, Spanish Sports Association, Spanish Paralympic Committee, Spanish Olympic Committee and other sport partners and competition organizers integrated in the Working Group for the Promotion of Sport of the National Sports Council.

Translated version: Ricardo Garcia Soriano (Valencia, Nov 2020)
Revised version: Manel Lligé Puig (Girona, Jan 2021)

I) GENERAL ASPECTS

1. Introduction¹.

In the context of the current COVID-19 pandemic and the new normal that has followed the confinement and de-escalation stages during the current year 2020, this protocol (hereinafter, the Protocol) establishes a general framework regarding the medical, sanitary and hygienic procedures, as well as the operational protocols to be applied in the organization of official national level, non-professional competitions at the state level. Additionally, and prior endorsement by agreement through the National Sports Council (hereinafter CSD), may serve as a reference and lowest bottom-line for the Autonomous Communities (CCAA), in the regulation and control of sports competitions under their jurisdiction, which favours the necessary inter-territorial harmonization and Administrations, and contribute to a fair and sportingly equal development of all competitions.

Previously, it should be noted that the Spanish Sports Federations (FFDDEE or FDE, hereinafter), under the coordination and supervision of the CSD, National Sports Council, pursue the governmental, administrative nature, public function corresponding to “qualify and organize, where appropriate, the official activities and purviews at the state level”, it should be borne in mind that, the organization of such competitions "is understood to refer to the regulation of their general framework”.

The evolution of the COVID-19 situation is being unpredictable regarding the sanitary angle issue, which requires the necessary constant taking of measures by the Government, including central government, the CCAA Governments, those of the Municipalities and the very FFDDEE themselves to deal with it. To date, under the leadership of the CSD and its Task Force for the Promotion of Sport (GTID), every party involved in the world of sport have worked in a coordinated way to provide a regulatory framework for the emergency that has allowed, on the one hand, the return to training of athletes and clubs, and on the other, to preserve professional competitions, thus avoiding aggravating the economic impact of the pandemic on the sector. This Protocol will be a continuation or a supplement, depending on the case, of those already existing and in force, in particular the CSD general for the return to training and the general competition lap, and of those to reinforce sports modalities, when they have been proposed previously by the FFDDEE and accepted by the CSD. Although this Protocol, from the sanitary point of view, will have the value of preferential framework of reference for those official national, non-professional competitions, must always be interpreted, when possible, taking into account the recommendations and good practices delivered and stated in other regulations; particularly in those areas not explicitly covered by this document, when the situation that arises raises difficulties initially unforeseen or when the evolution of the pandemic requires exceptional measures.

1 The National Sports Council guarantees the effective equality of men and women as one of its basic principles of action. To this end, the generic masculine mentions that appear in the following protocol will also be understood to refer to its corresponding relevant feminine, except in those cases where such it is specifically stated otherwise.

It is assumed that it is impossible to guarantee a completely risk-free environment and, therefore, the objective is not, and cannot be other, than to minimize it to the possible extent, applying the recommendations made at all times by the health authorities. In any case, the highest good to be preserved must always certainly be the health safety of sports and athletes, but also of society in general, and specifically of that part that lives with the athletes and their environment, especially exposed to contagion risks.

In order to minimize this risk in those competitions that are under the tutelage of the FFDDEE and are developed in the Autonomous Communities requires a Protocol of clear minimums, but it is also essential that the participants in the development of the competitions strictly respect all the recommendations, instructions and precautions established in this document, as well as the recommended standard good practices.

The athletes, technicians (coaches), assistants and other personnel who participate in the organization of the competitions must remember that their actions, and in particular, compliance with the requirements of social distancing, not only guarantee a safe environment in these competitions, but also allow the normalized development of them. Every FFDDEE member have a collective duty to show their leadership and to set an example in the rigorous application of these measures.

The specificities of athletes with a disability must be taken into account, such as the impossibility of meeting the safety distance for people with severe disabilities who need support or special treatment or assistance for competition wheelchairs, etc. As per this, the FFDDEE must provide in their reinforcement protocols the needs of these athletes and offer solutions to allow the development of training and competitions under equal conditions. In addition, all information related to health safety protocols and measures must be provided in an accessible format, compatible with compliance with the hygiene measures.

The CSD ruled at the time the staggered return to training, and this return framework, given that its provisions are of a general nature, is still in force, in the current new normal, and except in the field of professional competitions, it is the responsibility of the autonomous governments in coordination with the relevant local authorities, to set the requirements and protocols for the use of sports equipment and to safely carry out training. In any case, and in order to training, it has been decided to incorporate some general criteria, guidance, that allow to establish continuity regarding the start of the competitions, establishing a series of generic guidelines and recommendations that allow connecting, in a coherent way, prior preparation with the start of the official competitions.

This Protocol also seeks to contribute to the setting of prevention and safety regulations that must be developed during competitions subject to the FFDDEE tutelage and supervision, as well as to competitions when they involve teams or athletes from different Autonomous Communities or to those in which participate teams / athletes from other countries.

Finally, it should be clearly stated that the validity, both material and temporary, of this Protocol will always be conditioned to the evolution of the pandemic, and may consequently undergo changes, of national or regional scope, depending on the cases, which will be proposed by the CSD and decided in the GTID framework and the new Inter-territorial Coordination Platform GTID-CCAA, created, at the proposal of the CSD, on August 25.

2. Objectives.

The objective of this document is to set a minimum and common sanitary and operational basis for every official national, non-professional competitions at the state level, or international competitions that are under the organizational tutelage of the Spanish sports federations.

The changes occurring in the global context and in the regulatory conditions will almost certainly oblige us to periodically review and adapt these bases in the coming weeks or months as the conditions of the pandemic in Spain may change, such and as it has been stated in the previous section.

This document, as it cannot be otherwise, will be subject to and will be subsidiary to any regulations that, with a general or specific nature, may issue both the Central Government such as the CCAA, either for all sports activities, or for sports competitions organized by the FFDDEE.

In any case, the Protocol must also be subordinate to the priority and mandatory criteria that may be eventually issued by local Authorities in each of the municipalities where the COAE (official state-level competitions - official national competitions) should be developed, considering, in addition, that the Municipalities are the owners of practically all the sports facilities where they take place.

The principle that any adaptation of the provisions of this Protocol shall be aimed to reinforce health safety based on the evolution of the situation shall govern.

3. Scope of application.

The Protocol will apply:

- a) To official national, non-professional, state-level competitions (hereinafter COAE) duly approved by the relevant FFDDEE in their different categories.
- b) To the official international competitions held in the territory of the State, provided that they are included in the calendar meeting international level of the relevant International Federation in which the FDE is integrated or affiliated and all this, in coordination with the eventual protocols that the International Federations have established.
- c) To the concentrations and activities carried out in the territory of the State by Spanish athletes who are classified, or who have the possibility of classification, for the Olympic or Paralympic Games.
- d) The basic principles of this Protocol will be extended to all national and international federative activity under a concentration status.

Being aware of the need to provide a framework of special protection to competitions or activities aimed at the lower categories, each FDE, in coordination with the Autonomous Communities authorities of the venue where the COAE is held, may establish specific measures for the surveillance and control of the safety and hygiene measures set in this Protocol. Such specific measures include the appointment of a person responsible for the FDE and a representative of the Autonomous Federation, who must be present during the development of the competitions to ensure compliance with the measures established for this purpose. This specific measure recommended to the FFDDEE may not be applicable to each game of regular league sports during their carrying out.

4. Procedure.

- a- The CSD coordinates this Protocol (agreed with the FFDDEE and the relevant authorities of the Autonomous Communities), with the aim of serving as a reference document containing the issues that must be considered by the FFDDEE in the preparation of their protocols.
- b.- Once this Protocol is in force, each FDE may have its **own protocol** of reinforcement, image of the current one, in which all the points of this Protocol as well as, where appropriate, the specifications or particular aspects of each sport discipline, modality or specialty. The CSD will continue to validate these “**Own-protocols**” to reinforce all FFDDEE.
- c.- The CSD must validate the protocols presented by the FFDDEE within a maximum period of 10 calendar days, when possible (if applicable, the reasons for the otherwise), as long as the corresponding FDE submits it, understanding it to have been upheld if the CSD does not validate it within that period.
- d.- These protocols will deploy full enforce in the sports competitions to which this Protocol applies.

5. Principle of “self-responsibility” and “voluntariness”.

The Protocol and the basic rules emanating from it are based on the principle of "self-responsibility".

The responsibility of each one of the participants in the development of the competition is individual, being the duty of the relevant FDE the supervision of its compliance As well as or of the clubs where appropriate its application, having to extend the need /obligation of control to involved organizers, clubs and bodies belonging to the different groups or estates.

In addition to being considered an essential obligation, we must include within the principle of "Self-responsibility" the immediate and early communication before any indication of possible suspicious symptoms of COVID-19 infection, the adoption of measures of immediate isolation and individual non-presence in training or competitions when you suspect that you are infected or have been in contact with any person suspected of being infected.

Of course, never go to training or participate in competitions if you suspect that you are infected or have positive evidence in the close environment until medical authorization is received from the relevant health authority to be able to return to training and / or to meetings or to competitions.

The people and clubs that are integrated into the federated sports activity voluntarily and freely submit to the rules set by the authorities.

In competitive sport, the minimum social distance does not and cannot exist, and this implies a greater risk of contagion, which is assumed voluntarily and freely by the participants in the competition.

6. Roles and responsibilities.

To ensure the Protocol compliance with and ensure that it is applied correctly, that every health requirements are met and its operating principles are properly reviewed, each club / team must take the following measures:

- a- Not only every club, when it is the organizer of the competition or of those necessary activities prior to the competition, but as well the FDE, or the organizer of the competition in which they have delegated, must appoint a **Protocol Compliance Delegate** (hereinafter DCP) who will be responsible for ensuring that all the requirements of the preventive conditions of this Protocol are met. The DCP must be someone with sufficient prestige and authority within the club to ensure that all members comply with the obligations established in all competitions and authority within the club to ensure that all members comply with the obligations established in all competitions.
- b- In all sports facilities or spaces where a competition takes place, the organizer must designate a **Hygiene Manager (hereinafter HR)** who has specific and practical knowledge about the sports facility or space and its operation, whose sole responsibility will be to review the operational principles of the Protocol with the relevant local authorities, and ensure that all the principles, recommendations and hygiene measures established herein are correctly applied in the sports facility or space. The HR must have a good knowledge of the local epidemiological situation and the local measures in force. The HR is also responsible for implementing the Protocol for the entrance to the sports facility or space and its control area that guarantees the health of all people who enter the sports facility or space and that a covid-19 symptom form is completed.
- c- For the strictly sanitary control, the figure of **Chief Medical Officer (hereinafter JM)** of each FDE is created who will coordinate with the clubs or competitions sanitary managers.

It will be necessary to develop a control of health incidents at all levels and report them to the relevant authorities.

It will be the responsibility of the Spanish Sports Federations to recommend to all athletes / coaches / judges and all personnel needed for the development of the competition the use of the Government-developed tool **Radar Covid19** so that the ordinary protocol is also activated for greater control of the pandemic.

The result of the work of these three prior control mechanisms will lead, in the first instance, to a club decision, or where applicable of the athlete if it is an individual sport, to alert the FDE concerned. This, in turn, depending on the seriousness of the situation, whether isolated contagion or possible outbreak, will decide whether to alert or not the relevant authorities and the CSD.

The various commitments or responsibilities to be assumed in relation to the organization and participation in the COAE are schematically followed:

a) Commitments of the CSD:

- Coordinate and promote the adoption of this Protocol among FDE and CCAA for the restart of state, nonprofessional competitions
- Analyse and validate the "own-protocol" of reinforcement that each FDE may issue.
- Exercise coordination with the relevant authorities of each CCAA and the GTID through the Inter-territorial Platform

b) Commitments of the CCAA relevant authorities on sports issues

- Receive from the CSD the eventual FFDDEE reinforcement-own-protocols

c) Commitments of each FDE:

- Consider the production of a "reinforcement-own protocol" to be validated by the CSD under the general conditions set forth in this protocol.
- Implement and comply with all the necessary measures contained in the "reinforcement-own protocols" when the organization appertain to the relevant FDE.
- Demand the implementation and fulfilment of all the necessary measures contained in the "reinforcement-own protocol" when the start-up and development (factual or material organization) of a competition appertains to a person or body other than the relevant FDE.
- Require entities and people participating in the COAE -and in the case of underage: father / mother / legal guardian the signature or subscription of the mandatory document in which they undertake to comply with all the measures that are provided for in the protocol established for this purpose Require entities and individuals participating in the COAE - and in the case of underage: father / mother / legal guardian - to sign or subscribe mandatory document in which they undertake to comply with all the measures that are provided for in the protocol established for this purpose and in which the corresponding exemption from liability for possible cases of contagion in which neither organizational fault nor negligence is mediated and that are those of the current objective risk that each person must assume.
- Have a Protocol Compliance Delegate (DCP) who will be responsible for ensuring compliance with the established measures. In the case the COAE that are directly organized by the FFDDEE, the person who acted as DCP will be directly appointed by it. - Recommend the use of the RADAR COVID application to all those involved in the competitions.

d) Commitments of the organizers regarding the COAE:

- Implement and comply with all the necessary measures contained in the "reinforcement-own-protocol".
- Require those who participate to implement and comply with all the necessary measures contained in the "reinforcement-own-protocol". - Require the bodies and people participating in the COAE - and in the case of underage: father / mother / legal guardian- the mandatory signature or subscription of a document in which they undertake to comply with all the measures that are provided for in the protocol settled for this purpose and in which the relevant exemption from liability for eventual cases of contagion will be manifested in which there is no guilt or organizational negligence and that are those of the current objective risk that each person must assume.
- Have a Protocol Compliance Delegate (DCP) who will be responsible for ensuring compliance with the established measures.

e) Commitments of the participating persons and entities belonging to the different groups or estates:

- Comply with all the necessary measures embedded in the "reinforcement-own protocol".
- Strictly comply with all the measures that are dictated by the health authorities; and, especially, in cases related to possible cases of contagion, symptoms, close contact, etc. that require isolation, testing, providing information for tracing, or other measures established by medical professionals.
- Sign the document in which they undertake to comply with all the measures that are provided for in the protocol established for that purpose and in which the relevant exemption from liability for eventual cases of contagion in which neither mediate nor Organizational fault or negligence and that are those of the current objective risk that each person must assume.

7. Social distancing and hygiene measures.

In general, social distancing is considered to be the most effective way to minimize the risk of disease transmission, together with good hygiene, such as regular hand washing.

In every competition, and among those who are not on the court / track, in sailing those who are not on board the boats participating in regattas, it is recommended to respect a social distancing of **1.5 meters** at all times, and in no case, less than that established as mandatory by the relevant authorities.

Strict distancing measures must be kept between athletes and other groups of people who are in the sports facility or space where the competition takes place.

The use of the mask by athletes and judges teams during training and competitions is voluntary, while sailing, except in cases where more than two crew members (sailors) or more than one person on board a boat (coaches or judges), in such case the use of the mask is mandatory.

In any case, at specific times and in exceptional situations of the pandemic the regional authorities and / or the FFDDEE themselves, if they deem it pertinent, may require the permanent use of masks during workouts and exercises competitions when they are on the playing field / court.

It is mandatory that all athletes and other team members (technicians, assistants, refereeing teams, etc.) wear the masks within the competition playing area or court, except for the coach when giving instructions to his/her athletes and those substitute athletes who in application of the rules of the game are in permanent availability to be able to participate in the game at any time.

It will be extendable to cases of non-team sports regarding the participants when they are not participating in the competition, in the case of Sailing while they are not afloat and always in accordance with current legislation.

Recommendations for participants, team members and sports delegations:

a) At family and social level:

- Comply with social distancing.
- Avoid displays of love or affection that involve physical contact with third parties outside the area of usual coexistence who might belong to a risk group.
- Reduce the number of contacts to the usual circle and reduce the number of people in social gatherings (recommended less than 10 people) - Use of the mandatory individual mask at all times.
- Maintain exquisite hand hygiene with frequent washing with soap and water correctly.
- Use of hydro-alcoholic solutions if hand washing with soap and water is not possible.
- Avoid touching your eyes, nose and mouth with your hands. - If you suffer from sneezing or coughing, move away from anyone and cover yourself with your arm even wearing a mask or use disposable tissues, with hand washing later.
- Replace the mask if it is damp. - Extreme caution in crowded public places, keeping the distance of 1.5-2 meters.
- Avoid, as long as the health situation does not improve, public places where compliance with preventive measures may be more difficult to comply with.

- Maintain fluid communication with cohabitants and close contacts in case any unwanted contagion arises.
- b) At the training level - All of the above from the individual sphere and, in addition:
- Maintain a unidirectional flow that avoids crossing with other people.
 - Keep the minimum distance in the changing room or space enabled for this purpose.
 - Change, and if it is not possible do clean, the street footwear with which you access the sports facilities.
 - Never use the same footwear used on the street to compete and / or training. Mandatory change of footwear.
 - Maintain hand hygiene when going to change.
 - Place street clothes in a bag to be touched exclusively by the person concerned. Do not leave street clothes hanging in the changing room or designated space. Keep it all in a bag.
 - Wear clean clothes in each training session or competition, gathering them and washing all the used ones. - Individual washing of sports clothing is recommended.
 - Collaborate in the cleaning and disinfection of all the material used for the development of sports activity.
 - In situations of physical exercise, the recommended distance when there are moments of hyperventilation (breathing more times and with greater intensity) would be 5-6 meters with colleagues.
 - After finishing the training sessions, avoid gathering with other participants, establishing a sufficient time frame to carry out cleaning or disinfection tasks.
 - Do not share drinks or bottles of water, as well as all those utensils for personal use (mobile, tablets, sports bags, etc.).
 - Establish a sequence in the sessions scheduling. In the case of team sports, it would go from individual physical, technical, mini-group physical, technical, tactical, to small groups physical, technical, tactical, until being able to train the whole group, without contact, and if the situation allows it on the whole. - Be very careful with the medical and physiotherapy treatments to be applied to athletes.
 - Maintain strict medical control of each athlete.
- c) At the competition level - All of the above from the individual and collective preventive sphere and, in addition:
- Avoid greetings and displays of affection, by other forms of contact.
 - Scrupulously control the maintenance of hygiene and disinfection of the facilities and implements necessary for sports practice.
 - Avoid physically gathering with the other team or other athletes on arrival and departure from the facilities.
 - If the use of changing rooms is necessary, the use of as many of those as needed to maintain safety distances must be enabled, and if this is not possible, set shifts. This is applicable to referee teams and competition judges.
 - Do not share bottles of water or any other liquid, having to do an exclusive individual use. - Do not share the necessary implements for the practice of sport.
 - Be extremely scrupulous with all health, medical and physiotherapeutic care before, during and after competition.
 - Have all the sanitary guarantees of all participants including officials, referee teams and other people who participate in the development of the match.

8. Medical examinations prior to the competition.

Given the evolution of the COVID 19 pandemic, the CSD recommends that in all competitions, organized by the FFDDEE (even conveying this recommendation to the rest of organizers) at the beginning of the pre-season training or where applicable 72 hours before the start of the competitions, a specific COVID 19 test is to be carried out, whose purpose will be to know the situation of athletes and team members registered technicians, and the eventual early detection of possible positives or outbreaks.

Aspects such as the type of test to be carried out, its financing, the evaluation of its usefulness and if it must be performed more times subsequently (including through a mechanism of unannounced random tests) will be determined with health criteria, within the framework of the existing coordination mechanisms with the CCAA. These will analyse the evolution of infections in these sports competitions on a regular basis.

9. Commitments of the participants in the COAE.

All participants (athletes, coaches, judges, clubs, teams, etc.) in the COAE undertake to comply with all the measures established in section 7, as well as the existing general rules for the entire population. It will be mandatory to scrupulously comply with the safety measures and recommendations issued in the protocols and follow the instructions of the responsible for health of each club, facility or sports space.

10. Team members, individual athletes or staff of organization present at the competition.

Teams, clubs or athletes will minimize as much as possible the number of people who, not being completely essential, share training, travel, etc.

At the same time and as far as possible, no personal contact will take place with athletes and / or coaches between various teams, clubs or athletes.

The organizers will try to avoid the presence of personnel who are not essential to the start-up and development of the competition.

II) TRAININGS DURING THE SEASON.

The return to training of all persons to which this Protocol applies may be carried out before the start of the competitions when the relevant authorities authorize it in accordance with the protocols and requirements that are set in by each CCAA, or of the inter-administrative agreements that exist between the different Public Administrations.

The same criteria will be followed for the continuity of training during the season.

In the case of team sports, each club must evidence before the relevant FDE and at the beginning of the season by means of a formalized document, compliance with all requirements set by the relevant authorities for the start of training. Had the training sessions already started, such will be done when it comes into effect this Protocol. Failure to comply with this obligation will prevent participation in competitions official of all club teams.

At the same time, during the season, every club will send to the relevant federation every 15 days the formalized document of compliance with all the requirements set by the relevant authorities for the development of training.

Failure to comply with this obligation will prevent participation in official competitions under the organizational tutelage of the federation of all club teams during the period of non-communication, in accordance with the procedure that each FDE stipulates.

III) TRAVEL AND ACCOMMODATION *(if applicable)*.

The prevailing rules or regulations that already have been issued or might be dictated by the State or the CCAA for the types of activities that are not sporting nature will apply.

In order to facilitate the development of the competitions within the maximum possible normality, in the event of restrictions on interprovincial mobility or inter-territorial by the competent authorities, the CCAA commit to authorize the movement of athletes and technical personnel necessary for the holding competitions.

For the purposes of completing the above, the FFDDEE will send the list of athletes and technical personnel involved in the celebration of said competitions to the competent authorities of the CCAA and, where appropriate, of the CCLL. In the case of holding international competitions that involve the entry into Spain of foreign teams / clubs / athletes or departure abroad of national teams / clubs / athletes, the FFDDEE shall arbitrate a mechanism of coordination with those of teams / clubs / athletes involved in order to guarantee the homogeneous level of health security.

1. For athletes, technical and operational personnel.

When teams or athletes travel by means of collective transport, the rules issued by the relevant Public Administrations for this type of travel must be met. In any case, the equipment or Athletes will assess whether individualized trips can reduce risks.

In any case and as a minimum, the teams and athletes must comply with the following requirements when traveling:

1. Use of masks in all public spaces during the trip.
2. Social distancing with anyone outside the group of athletes and technical personnel who are not part of the team.

3. Regular use of hand sanitizer.
4. For bus trips when not traveling in private cars, the teams must ensure that the bus has been thoroughly disinfected before the trip.

The official delegation (e.g. club president, board of directors, etc.) traveling with athletes and technical personnel should be kept to a minimum. Except that the FDE established otherwise, a maximum of 3 people from the official team delegation may attend the competition. These people will have the same obligations as any other team members.

2. For referee teams, judges, federative personnel and staff of the competition

The same rules as in the previous section are recommended, and must prevail the use of private vehicle whenever possible.

The refereeing teams, competition judges, the federative staff and the staff of the sports facility or space must take the utmost care and maintain strict social distancing at all times during travel. They must wear a mask (covering mouth and nose) throughout the trip when social distancing is not possible, or anticipated impossible, as well as regularly use a hand sanitizer.

3. For all of them in general.

In the case of team sports, or those club competitions in individual sports, whether the athletes, refereeing teams, competition judges or other personnel participating in the competitions must stay overnight, they will try to follow the following recommendations:

- 1- If possible the members of the team / club / individual athletes will stay in individual rooms.
- 2- It is advisable that all members of the same team stay and eat the necessary meals in a single hotel and / or restaurant. For meals, form small and stable groups to minimize the number of close contacts
- 3- Contact with other guests or hotel staff other than the essential should be avoided, through a specific dining room system.
- 4- The members of the team / club / individual athletes should be solely responsible for handling equipment and team clothing as well as suitcases and the like.
- 5- The DCP of the team will be responsible for ensuring that the Hotel and / or Restaurant complies with the standards established by the competent authorities for this purpose.
- 6- The members of the teams / club / individual athletes (both athletes and technical staff) should not leave the hotel unless it is under previously agreed and organized conditions and that they do not involve contacting anyone outside their group.
- 7- The team's DCP is responsible for ensuring that standard hygiene measures are met during any trip or outing by the team and during the stay at the Hotel and / or Restaurant

The Technical Committee of Referees (CTA) or the Officials Technical Committee in the case of Sailing (CTJ), or the Territorial Committees will be responsible for ensuring compliance with the health protection requirements for referee teams / competition judges.

Participating teams or individual athletes must agree not to start the displacements, if any of its athletes, technicians or other members of the expedition show symptoms consistent with COVID-19 infection.

In the same way, proceed if any of the members of the expedition has been in close contact with a person declared positive by test, or with symptoms Confirmation pendent.

Likewise, if the period of isolation or quarantine recommended by their medical services, or by public or private health care services, whatever the cause that motivated it.

Participating teams or individual athletes must commit to carry out correct isolation, including the use of a surgical mask, before any initiation symptoms wherever production starts.

In the same way, they undertake to immediately report both of the health authorities, the autonomous Federation to which they belong and the relevant Spanish Federation any incidence in the state of health of any of the members of the expedition.

The obligations derived from these aspects are extendable to any of the contacts that may have had, or may be in contact with, the components of the delegation.

IV) FACILITIES and / or SPORTS SPACES.

All sports facilities or spaces where the training and / or competitions must follow the opening and / or use protocols established by the relevant authorities whether at the state, regional or local level.

In the case of sports with regular leagues, the clubs will send at the beginning of the season (or at the time of entry into force of this Protocol) to the relevant FDE a responsible declaration where the fulfilment of the regulatory requirements set by the relevant authorities

The same must be done since the moment there is a modification of the rules applicable to sports facilities and / or spaces and within a maximum period of 48 hours since the entry into force of the new regulations.

You must also submit to state, regional or, where appropriate, local safety regulations and police conditions that are necessary for the organization of the competition and supervision of safety in sports facilities and / or spaces

All sports facilities and / or spaces must display the relevant signalling set by health regulations and / or public shows; there must be informative posters with general hygiene measures throughout the premises.

A protocol will be enabled for the departure and return of boats to the sea (by clubs, autonomous federations, etc.) so as to avoid the accumulation of boats on the ramps, maintaining a minimum separation of 1.5 at all times meters for which this circumstance will be taken into consideration when deciding take the boats out to sea (delta).

Compliance with regulatory requirements for hygiene and safety in facilities and / or sports spaces is considered an integral part of the technical requirements for the federative authorization of the sports facilities and / or spaces, so that, in case of irregular situations are detected, it may lead to the withdrawal of the authorization for the use of said sports facilities and / or spaces for official competition.

V) COMPETITIONS

The applicable regulations to competitions will be, in any case, those dictated by the FFDDEE for the COAE.

All the clubs or bodies organizing the competitions and the clubs or individual athletes participating in them must comply with the regulation provisions set by the relevant authorities for this type of event.

In any case, and complementarily, the FFDDEE will ensure that in the official competitions at the state level that are part of the competitions under its guardianship, the following rules are met unless provided that they are not incompatible with the rules issued by the relevant public authorities, which in all cases will be of preferential application:

1. Programming.

All competitions will be scheduled with enough time in advance so that all the spaces necessary for the development of the competition can be cleaned and furthermore this must be coordinated with possible television schedules when there is television broadcasting of the games.

The club or the organizing body, under federative tutelage, will be responsible for checking the adequate owner compliance with the hygiene and safety protocols of the facilities.

At the ceremonies held on the occasion of the regatta, the social distancing and if carried out they will preferably be carried out on air free.

The use of masks for all attendees will be mandatory.

In the podium area and the delivery of trophies there will be disinfectant material, being mandatory Wear gloves for delivery and personal contact will be avoided.

2. Conditions of access to sports facilities or areas bounded by the organization in other sports spaces.

The club or the organization organizing the competition must have, at least, the following items:

- 1- Digital thermometer for taking external temperature.
- 2- Bottles of hydro-alcoholic solution for hands
- 3- As far as possible, disinfectant mats will be placed at the entrance for footwear.
- 4- A minimum number of 5 boxes of masks to be distributed among those people who, exceptionally, must enter the sports arena and they are not allowed to bring their own protection and safety material.

All participants / attendees must wear the mask when entering the venue or areas limited by the organization in sports spaces.

Access to upper floors will be made using the stairs, limiting the use of the elevator to only in case of need

The organizer of the competition must guarantee:

- a- That all those who are going to participate and enter the sports facilities or areas delimited by the organization in sports spaces:
- b- Have completed an epidemiological control form.
- c- Having disinfected their hands.
- d- Use the mask, unless they are athletes in the competition area or the coach and the refereeing team or judges, although it is recommended also its use during the competition.
- e- Keep social distancing.
- f- The non-entry into the regatta headquarters of those people who in the control temperature exceed 37.5°. In case of higher temperature, the intake will be repeated and if it is maintained or increased, it will be immediately reported to DCP

Had a person not filled out such a control form, then the Statements made in said cannot be proved and his access to the stadium or regatta venue in the case of Sailing will be denied.

3. Masks and hand sanitizer.

Masks covering the mouth and nose must be worn by everyone who operates and participate in the facilities and / or sports spaces at all times.

Failure to use the masks will be reported to the DCP and the HR of the sports facilities and / or spaces, and will entail expulsion from the venue.

Hydro-alcoholic solution should be provided at all access points to the venue facilities and / or limited areas in sports spaces and at the entry points to each one of the different zones.

All persons entering or swapping zones must make use of hand sanitizer. It is the obligation of all people participating in the competition to bring their own mask.

4. Hygiene procedures at the facilities.

In general, every of the facility area or enclosed sports areas must be cleaned to be used for the competition before use. These areas include also the work areas of the media, the seats (Depending on use), offices, meeting rooms and sanitary facilities. Special attention must also be paid to elements such as the timing table, computer equipment, etc., when these are necessary for the type of sport and meeting.

It is the responsibility of the local club or the organizing body of the competition to ensure that these procedures have been properly executed at the times prior to its beginning.

VI) ACTION FOR THE DETECTION, SURVEILLANCE AND COVID-19 CONTROL

1. FFDDEE must comply with and enforce the provisions of this section of the Protocol.
2. The presence or participation in activities and, especially, in competitions people who: (i) present symptomatology compatible with a contagion; (ii) were infected without a resolved infection; (iii) her quarantine had been established for having maintained close contact with a confirmed infected person or, even though this cannot be determined, with person with symptoms compatible with a possible contagion. Throughout these cases, the criteria to be applied by the Spanish sports federations must result at all times from the provisions by the health authorities.
3. The clubs, regarding their members, or the participants, in the case of modalities and specialties that are not considered sports team, will have the obligation to communicate to the Spanish federation the cases that, based on what is stated in the previous section, imply the impossibility of taking part in official federated competitions at the state level.
4. In cases where contagion took place, the return to sports activity, and very especially to competitions, will require the Spanish federation authorization, this being conditioned to the contribution by the interested parties of the relevant medical documentation accrediting the objective existence of a situation that does not compromise health, neither of the affected person, nor of other people with whom he had or might have had contact in sports activity.

Failure to comply with the obligations under the Protocol will involve the application of the sanctions system established by each FDE and / or, where appropriate, the organizer. In cases of suspicion of an outbreak during the pandemic, the responsible FDE or organizer shall report to the CSD and relevant health authority within 24 hours knowledge of cases. The organizers FFDDEE and proficiently appropriate mechanisms to punish those who violate participants the provisions of this Protocol and, where appropriate, the reinforcement-own can award immediate disqualification.

VII) AUDIENCE/PUBLIC

At the present time development and evolution of the pandemic, and regardless of the CSD has set as a criterion for professional competitions on which it is relevant no presence of the public, the majority request of the sector is oriented round competitions for the 2020-2021 season with controlled and gradual presence of public, always acting with prudence required by the situation sanitary itself.

With the aim of combining the return of the official federated competitions of state level and non-professional character with the essential health safety, it is considered Eventually possible, in order to help as much as possible the return to social normality, the presence of the public in the development of the competitions under this protocol, with the following specificities: The sanitary attributions required for a safe return to competition, which it is at the cusp of the objectives pursued at this time, are based in a regional basis, for which the CCAA may adopt the measures necessary to ensure that the development of competitions with eventual presence of public, is carried out in the best possible conditions of sanitary safety, varying what is established in this section.

Sports attributions on federated competitions at the state level and non-professional character are located in the FFDDEE, under the supervision of the CSD in attention to the delegated public functions, for which they may adopt the decisions they deem pertinent on the influx of public in the competition, together with the organizers of the same, to guarantee the development of the same in equality of public conditions when this can be considered as a factor essential by the relevant FFDDEE, and all without overriding, in any case, the decisions adopted in this regard by the CCAA on public attendance limitations referred to in the previous paragraph.

It is recommended in Dinghy Sailing competitions, restricting access to launching and boat parking areas where the sailors stand exclusively to themselves and support staff duly registered in the race.

In case an Autonomous Community decided to approve the presence of the public, the National Sports Council recommended that the maximum number of audience will be 500 people set for the covered facilities and 1.000 people for outdoor facilities, always respecting the general requirements established by the relevant authorities and incorporating the recommendations for attendance limitations must be agreed in the Public Health Committee of the Inter-Territorial Council of the National Health System.

Autonomous (regional) stages or groups included in State level competitions will be governed by the provisions of the Autonomous Community. Given the fluid situation, changing and asymmetric pandemic, the Interregional Platform will meet before 1 November and once the official State-level competitions have been restarted, and in order to assess the suitability of reviewing these attending limitations.

VIII) ACTION IF A POSITIVE ARISES IN A COMPETITION

If a positive is detected in a team or during the development of a non-professional, state-level competition:

1. Report positive to:
 - a) Health Authorities of the relevant Autonomous Community. Subject to the recommendations of the relevant CCAA.
 - b) Relevant FDE
 - c) Relevant local authority in the territory where the competition takes place

2. Automatically follow the protocol of the Ministry of Health and / or health regional authority
3. Was there any close contact within the club, in the same way, the protocol of the Ministry of Health and / or regional health authority should be followed.
4. Facilities should be disinfected.
5. FFDDEE should establish tracking system possible positive cases caused by close contact in coordination with the health authorities.

The calls on the development of regular competitions (leagues), as well as upheld decisions regarding the continuity of them will be responsibility of the Spanish sports federations through previously settled criteria for all participants. In the event of for health reasons or by supervening impaired interprovincial mobility or between autonomous communities, every Federation must provide an alternative calendar mechanism to finish the season by regaining matches and a minimum objective criterion of each FDE and / or competition, depending on who is competent to give the competition settled, establishing a minimum of games or days to have been held or an alternative if the postponement situation of the competition should continue.

IX) ATTACHES

1. Technical guide for organizers, officials and judges in competitions for the covid-19 prevention
2. Personal location form and declaration of submission to the specific rules of the pandemic
3. Responsible team manager certificate from (only in team racing)
4. Model checklist
5. Risk summery

1. TECHNICAL GUIDE FOR ORGANIZERS, OFFICIALS AND JUDGES IN COMPETITIONS FOR THE COVID-19 PREVENTION

Carried out by the Officials Technical Committee (CTJ), under the supervision of the medical services of the Royal Spanish Sailing Federation (RFEV).

This guide has been drawn up by the Officials Technical Committee with the supervision of the RFEV medical services. The purpose of this guide is to guide users about adaptation to the practice of sailing competition from the recommendations issued by the public Powers and specialized agencies to prevent infections and contagions, so it does not constitute any mandatory rule.

The recommendations contained in the guide do not alter nor do they modify the guidelines issued by the health authorities, which must be respected scrupulously. Neither the Technical Committee of Judges, nor the RFEV or any person who has taken part in the production of this guide or that is mentioned in it, they assume responsibility some for damages that could be attributed to the follow-up of the recommendations included in it. It is recalled that the decision to participate in sailing competitions rests exclusively on the individual person

0. INTRODUCTION

In response to the current outbreak of the coronavirus (COVID-19), this guide has been produced with the objective of assisting all Race Officials, Judges and Measurers in the performance of their duties.

The objective is to help them to follow the recommendations of the health authorities during the exercise of their work in the development of the competition. COVID-19 is a virus that can cause Acute Respiratory Distress Syndrome and pneumonia.

No vaccine is currently available, and the goal of health authorities around the world has been to contain the virus through preventive measures to limit and stop widespread transmission.

This serious challenge to public health requires close collaboration between international agencies, governments and event organizers, in order to protect the health of athletes, judges, technicians and the other sailing community.

WS publishes a guide for event organizers that may be useful to read, available at: <https://www.sailing.org/medical/index.php> "Knowledge of SARS-CoV-2 behaviour, its expansion, infection methods, prevention measures, etc., are subject to continuous evolution, so this guide may be modified in monitoring the progress made in the knowledge and control of the illness."

1. PRIOR TO COMPETITION

The following must be taken into account:

- a) It must be included in the Notices of Races, as an essential requirement for registration, the contact details of all participants in case of emergency, as well as their place of accommodation during the championship, telephone, etc. (see annex 1), making it clear that this information can be shared with local Public Health Authorities to allow rapid contact tracing if a participant in the event suffers from the COVID-19 disease or came in contact with a confirmed case.

- b) Set all the means to avoid the agglomeration of participants during the event. As an example, have an official virtual notice board, create a WhatsApp group with the coaches to have closer communication and duplicate information from the ONB (arrival orders, time limits, protests, etc.). In the event that social distancing cannot be guaranteed, the boat docking area will be limited exclusively for sailors, coaches and Officials, as well as exit and entry protocols for boats into the sea.

2. BEFORE GOING AFLOAT

Following the line of avoiding concentrations of people, they must remain at all times with a recommended distance of at least 1.5 meters between them. Other measures include:

- a) Control the influx of people in the race office. This must be limited to one coach per autonomous federation or team, not allowing a capacity greater than that which allows compliance with the distancing rules. Promote that the coach bring the fulfilled documents to the race office, avoiding that it is carried out on site as well as carrying out a frequent disinfection of the furniture.
- b) Reduce to one the number of meetings with the team leaders before the event and where only one representative per team participates. These should be celebrated in places where it is possible to maintain the recommended distance measures at outdoors. Other meetings can be held electronically, for which the time of the meeting and the system by which it will take place will be informed.
- c) Hold meetings with the race committee members, complying with the distancing measures and, where possible, outdoors.
- d) Place disinfectant dispensers at the entrances to closed places: regatta office, meeting rooms, hearings rooms, etc.
- e) Establish as a preventive rule the use of masks for all personnel while they are ashore whether the keeping of interpersonal distance is not guaranteed.
- f) The measurements and equipment inspections to teams will be carried out in such a way that the maintenance of the safety distance is guaranteed; otherwise the mask will be used. The use of shared items will be avoided during the measurement and it will be disinfected frequently.

3. AT SEA

The committees must undergo measures in order to mitigate risks, among others the following are indicated:

- a) Pre-disinfection of committee boats as well as minimizing the number of officers on board of committee boats. A minimum of 3 people may be increased depending on the boat characteristics. Use of masks while on board as well as frequent hand washing with soap and water or with a hydro-alcoholic solution. In the use of radios, each officer must have a radio assigned for their exclusive use.
- b) Reduce the number of people on board mark-layer and judge boats to two, who will be provided with masks and must be equipped with a VHF radio and make mandatory use of kill-cord and personal flotation devices.
- c) Especially judges and measurers must reduce contact with sailors at sea to a minimum.
- d) Every day upon return from activity at sea, disinfect the surfaces of the vessels with which you have the most contact, especially on committee boats and boats if they are to be used by a different officer the following day.

4. AFTER RACING

- a) Measurements and / or post-regatta equipment inspections will be carried out in such a way that the measurement area is only accessed by one boat at a time. While carrying them out, the relevant hygiene measures will be followed, such as social distancing and frequent hand washing and if so needed, protective items (masks and gloves) will be used.
- b) Post the callings for audiences, boats selected for measurement and other notices in the virtual ONB as well as in the regatta WhatsApp group.
- c) Hearings will be held in rooms that must be well ventilated, allowing a minimum distance of 1.5 meters between the parties, witnesses and the protest committee to be maintained. A table not less than one meter wide will be used.
- d) The use of masks during the hearing will be required to all who are in the room, as well as to wash their hands with disinfectant liquid when entering and leaving it.
- e) The admission of observers must be conditional on having sufficient space to guarantee the minimum distance.
- f) Disinfection of the table as well as the protest boats models after each hearing and proceed to wash the hands of each of the audience attendees, parties, witnesses, judges)

2. PERSONAL LOCATION FORM AND DECLARATION OF SUBMISSION TO THE SPECIFIC RULES OF THE PANDEMIC *

To be filled in by all competition participants

Sailor <input type="checkbox"/> or Staff <input type="checkbox"/>	
Surname	
Name	
Passport / ID Nr.	
Contact telephone during the competition	
Sailing Association	
Sail number or staff position	
Accommodation during the competition	
Parent / Guardian (in case of minor)	
Surname	
Name	
Passport / ID Nr.	
Contact telephone during the competition	

HEREBY DECLARE:

- Undergo intake of body temperature control on a daily basis when entering the facilities and as often as required for it.
- Being aware of the obligation to stay at home or accommodation in the case of fever higher than 37.5°C or in the presence of other symptoms related to the SARSCOV-V2 virus.
- Being aware that in the case of showing symptoms compatible with the virus, I agree to notify the person responsible for the protocol of the regatta, return immediately to home or accommodation and not to stay in the venue facilities.
- Not having been in direct contact with people diagnosed positive for the virus.
- Not having transited or travelled to or from places subject to quarantine.
- Commit to respect all the rules and instructions, especially the inter-individual distance, and to observe the hygiene rules, especially frequent hand washing and the use of a mask at all times when it is not possible to maintain an inter-individual distance greater than 1 ½ meter.
- That the above indicated telephone number is the active number where to be reached if necessary.
- Be aware that those responsible for the facilities cannot guarantee full security at the facilities in this context, assuming personally and individually all the consequences and responsibilities.

Location and date: _____ Signature (Parent or guardian in case of minor): _____

3. RESPONSIBLE TEAM MANAGER CERTIFICATE FROM. (ONLY IN TEAM RACING)

Signed father/mother/custodian, in the case of underage,
of legal age and with ID, with the telephone number,
and address
As Protocol Compliance Officer (DCP) of the team.

(Signature).....

I HEREBY CERTIFY

1- That no participant shows any compatible with the SARS-CoV-2 Coronavirus symptoms (fever greater than or equal to 37.5 degrees, cough, general malaise, feeling short of breath, loss of taste, headache, fatigue, neck pain, muscle pain, vomiting, diarrhoea) or any other typical symptom of infections.

2- That no participant has tested positive or had close contact with any person or people with possible or confirmed symptoms of COVID-19 in the 14 days immediately prior to the date of signature of this document.

3- That it has been documented and made available to all participants of the event the safety protocols and information measures and hygiene prevention and COVID-19 safety and that they have been informed of the exclusion from the competition and the facilities or limited area of the sports space for any of the participants who fail to comply such standards.

4- That I am aware and accept that non-compliance with the rules of COVID-19 especially failure to report confirmed positive cases or people with symptoms implies a very serious offense of the disciplinary code that can lead to an exclusion sanction of the competition and, where appropriate, loss of the sports category.

5- That the event organizer has registered in every participants for the purposes to be able to have a traceability in the event of a positive or positive symptoms among any of the participants who had close contact with the others on the occasion of the event.

At the same time, I declare to be informed of the specific protection and hygiene measures established in the Protocol of the CSD and of the Spanish Federation of whose rules are mandatory for participants in official sports competitions of, so as for all clubs affiliated to the Federation that participate in them.

Compliance with the aforementioned standards is an individual responsibility of each of the participants and the club or entity that organizes the event, without there being any responsibility by the Spanish Federation of ... of the infections that on the occasion of the carry out of the competition could occur.

And for the record for the appropriate purposes,

I issue this certificate in on.... of of

Signed:

4. MODEL CHECKLIST

The event organizer or the of the facility owner will develop point by point, based on the Protocol, a checklist to be included into every specific plan of each sports centre, facility or space, as well as into the specific plan of a sporting event.

In addition, those responsible for the prevention measures in each section will be defined, a list will be drawn up that can be easily verified and its correct compliance with the sections that correspond in each case will be verified and it will be attached to the specific Plan.

Check list template table:

GENERAL RECOMENDATIONS	YES	NO	No Proced
- HANDS SANITATION:

5. RISK SUMMERY

COVID-19 risk assessments COVID-19 for multitudinous event: principal considerations.

Please, fill in with “YES” or “NO” to the following questions relative to the risks:

COVID-19 additional risk in multitudinous event	Y (1) N (0)	Score
Will the event be held in a host country with registered spreading locally active (spread in the population)?		
Will the event include participants from countries with registered spreading locally active (spread in the population)?		
Will the event include a significant number of participants at a high risk of getting a serious illness? (e.g., people over 65, people with impaired underlying health)?		
Will the event be held mainly indoors? And/or will people keep in contact with each other for a long period of time?		
COVID-19 total score risk		
Mitigation total score of COVID-19 Mitigation card		

RISK OVERALL SCORE	Well ready to mitigate the COVID-19 effects (76-100)	Somehow ready to mitigate the COVID-19 effects (51-75)	Barely ready to mitigate the COVID-19 effects (26-50)	Ill ready to mitigate the COVID-19 effects (0-25)
0 (very low risk)	VERY LOW	VERY LOW	LOW	MODERATE
1 (low risk)	VERY LOW	LOW	LOW	MODERATE
2 (moderate risk)	LOW	LOW	MODERATE	VERY HIGH
3 (high risk)	MODERATE	MODERATE	VERY HIGH	VERY HIGH
4 (very high risk)	VERY HIGH	VERY HIGH	VERY HIGH	VERY HIGH

PRINCIPAL CONSIDERATION	
VERY LOW	The overall risk of transmission and subsequent spread of COVID-19 are Considered very low.
LOW	The overall risk is low; however, it is recommended to check whether the mitigation measures might be reinforced
MODERATE	The overall risk is low; however, it is recommended to check whether the mitigation measures might be reinforced
VERY HIGH	The overall risk of transmission and subsequent spread of COVID-19 are considered very high.
