BODA World and European Trials

QUALIFICATION SERIES SCORING

Scoring a sailor's position in the qualification series will be calculated as per the Notice of Race.

Recognizing that races used for the qualification series may have overseas participants, qualification series scoring will exclude any non-Bermudians or those that don't normally reside in Bermuda.

For those sailors attending school overseas, qualification series scoring will accommodate their situation by applying average points for races they do not sail due to their school being in session. The calculation of average points for overseas students will be governed as follows:

- At the end of the qualifying series, average points will be awarded by calculating a finish place average by the following formula, before discarded races:

$$\text{Finish Place Average} = (F1 + F2 + F3 + F4 + F5 + F6 + \dots + Fn) / n$$

F = score of each race, excluding those races awaiting average points

n = total number races, excluding those races awaiting average points

- The number of races awarded average points will not exceed 20% of the races of the qualifying series.
- Missed races more than the 20% rule above will be scored DNC. DNC shall be total number of starters in each race + 1.
