Explanation:

In race 6, during the first downwind and about 200 meters to the bottom gate. we ita 748 was sailing on port with the gennaker on and boat number 742 was sailing on an upwind starboard tack. at 5 boat lengths between the boats we were not on a collision course. just before the crossing with us in front a huge right shift changed the boats courses, we didn't hear any right of way call from the other boat, only two seconds before the accident we heard "owwww". we immediately tried to bare away to avoid the otherboat 742. we didn't see any change of course or try from 742. we ended up crashing 742 on her leeward part of the hull with our bowsprit which broke in two pieces. After the crash we decided to retire since not able to sail.
